

EVOLUTION VALVES

THE NEXT EPOCH

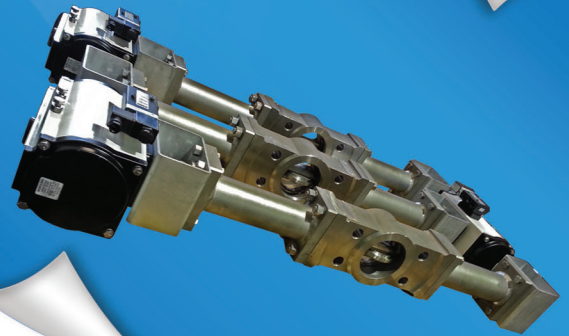

Fine Control Butterfly Valves

QUALITY

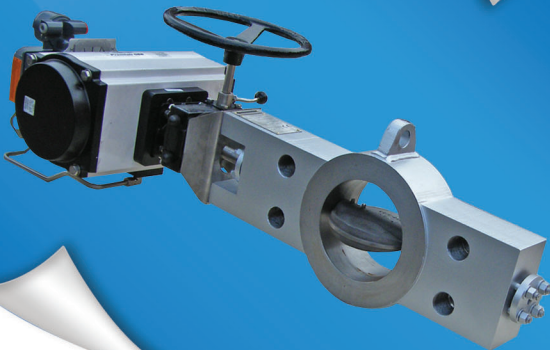

Evolution Valves manufactures a unique range of Butterfly Control Valves which can be utilised in the most demanding applications.

All of our valves are designed to perform at optimal levels within our client's environment taking in due consideration the media's flow conditions and the requirements of the process.

PERFORMANCE

RELIABILITY

EFFICIENCY

Our valves can be used in preference to globe valves for fine control particularly in low ΔP applications and larger pipe diameters. Our flow balancing valves, used globally on metering skids, can be made in a range of sizes and pressure classes.

Our design team includes process engineers allowing their direct experience to drive the correct product selection.
