

Triple Offset Butterfly Valves

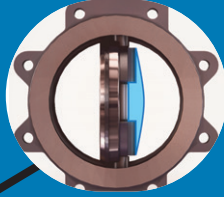

We are proud to announce the launch of our world beating TOV

Evolution Valves have redefined the existing Triple Offset into a world beating Valve by introducing “in house” patented technology that results in superior sealing performance.

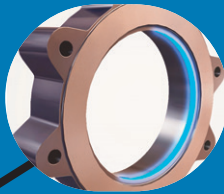

Main Features:

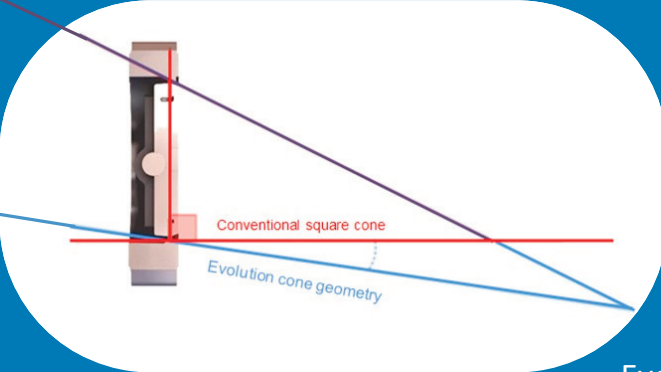

Live loaded gland packing comprising of a quadrilateral stud arrangement guaranteeing an emission free environment.

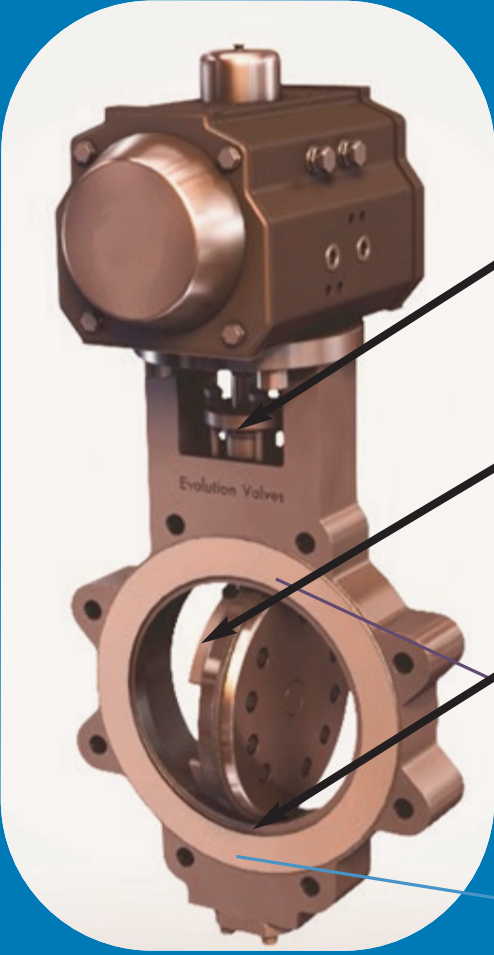

Releasable “handcuffs” affixed to an octagonal shaft allows for “easy disc” release, shear free torque resistance, lowest life time maintenance cost and actuator assembly at every 45° position.

Integral body eliminating the need for any seat potentially damaging bolts exposed in line. Tungsten and chromium carbide alloy overlays giving superior long term maintenance free performance.

Revolutionary “acute angle” cone geometry giving 360° interference angle delivering true zero leakage across the entire seat.
